PRIORITIES

- Everybody runs his/her life on some sort of priority scale.
- Vertical Alignment is a tool that enables us to have a standard priority to live our life from which all other priorities are derived:

God	Community
Spouse	Country
Children	Job
Family	You

- Making decisions about priorities requires a way to gauge those priorities.
- Life's decisions shouldn't be based on emotional content or other people's priorities.
- Learn to manage your priorities efficiently.
- Embrace priorities! It as an opportunity to engage, to complete an action item, an opportunity for growth and to maximize your potential.
