

E5 Leader

HOW TO TEACH YOUR CHILDREN

- How can I get this information into the hands of my children? This is the number 1 question I receive. You've been exposed to E5. You've implemented its teachings into your life. It is only natural to want to allow it to flow from you into your family, especially your children.
- Be the best model you can. The best way to teach them is to be a beacon of hope for them. Be the best model you can. Offer it to them. It's their choice, through free will, to accept it. Don't try to force-feed anyone.
- Buy them the book. When dealing with children, it is effective to use a third-party verification system and a third-party presentation system. If it's something that you're practicing, they see you doing it and now you can do it together!
- Let them go at their own pace. Their young minds are developing. They have a lot going on in their lives. As they see you living out the life and culture of thought of an E5 Leader, they'll adapt.
