

# E5 Leader

## AUTHORITY

1. In life, we're put in positions of authority - expected and unexpected. Responsibility comes with authority.
2. Another definition of authority: the ability to make a decision. Nobody has given us this authority; it is preconceived. Whatever we make choices about, there is an authority that accompanies it.
3. Authority is a predestined position inherent to human beings. Through authority, we gain respect and ascend to higher levels

of authority, where we have authority over others.

4. Authority is a tool. Don't be tyrannical with it or you won't keep your authority very long. Be a servant and respect those people under your authority.

5. Leadership authority - Don't pass on a negative authority. Take the word "authority" seriously. Teach others that you have authority/governance of your life and those around you. Be a good steward of your authority.
