## HOPE

- Hope is having belief in something that isn't seen.
- Hope builds life, creates enthusiasm, and gives a torch to guide the way.  
Without hope, you are destined to the worst things in life instead of the best.
- When a baby is born, there is great hope for that child's success in life. .  
Parents keep belief alive because of their hope for a better future and better life for their child.  
Parents teach the child to avoid the moss-covered rocks of life and not slip and fall as they did. That's a generation of hope.
- Hope comes from a formula: Whatever a man's mind can conceive and believe, he will achieve.
- Beware of those who try to steal your dream.  
Fight for the dream; find a way to keep that hope and dream alive. Take captive of negative and toss it out.
- There has never been so much opportunity as right now. Now is the time to be hopeful!
- Re-instill your faith in things you are hopeful for:  
in the process of learning, teaching, growing and developing because there's always hope in any new adventure.
